ISBN: 9781108819015. Celestial and Stellar Dynamics by Barbara Ryden published by Cambridge University Press in 2025. This book focuses on the centuries old field of celestial dynamics. There were the discovery of many exoplanetary systems orbiting different stars. This account explores the various behavior of planetary systems, permitted by Newton's law of gravity, including Solar System. It examines the stellar dynamics – stars and other celestial bodies, and the underlying physics, applying on small and large scales. This book offers many examples and focuses on key physical processes, giving a better understanding of how this field developed.<https://www.cambridge.org/gb/universitypress/subjects/physics/astrophysics/celestial-and-stellar-dynamics> <
